Eagle Hand Sinks

Hand-transmission is a critical factor in the spread of bacteria, pathogens and viruses which cause disease and foodborne illness. Foodborne illness kills over 10,000 people each year. Over 70% of all outbreaks originate in foodservice operations and as many as 40% are the result of poor hand washing and cross-contamination. The average incident costs the foodservice industry over \$75,000 and results in significant losses of future sales.

Eagle offers many different styles of hand sinks to help control the spread of foodborne illness.

Over 30 models including...

...Traditional:

Includes "the industry standard" – the HSA-10-F

...Hand Sinks with Standard Towel & Soap Dispenser:

Modeled after our Traditional Hand Sinks, but come standard with C-fold towel dispenser and soap dispenser

...Valve-Operated:

Great for hospitals, "hands free" operation for less contamination

...Electronic:

Sensor-activated faucet conserves water; electronic "eye" soap dispenser minimizes cross-contamination between soap & water dispenser

...Space Savers:

Designed for maximum space efficiency – only 12" from side to side!

Optional MICROGARD® for Hand Sinks

- MICROGARD® is an antimicrobial agent which contains built-in protection to retard the growth of a broad range of bacteria, mold and mildew on the surface that cause stains, odors and degradation.
- MICROGARD® combines inorganic antimicrobial silver ions with a patented delivery system. The patented delivery system triggers the release of silver ions which react with bacteria in three ways:
 - 1) suffocates the cell,
 - 2) stops the cell reproduction system,
 - 3) stops the cell from growing.
- MICROGARD® is a second line of defense. In keeping with good hygiene practices, clean this product as usual. The protection will not wash out, while organic bactericides may.*
- Note: To clean, use mild soap and water, rinse, and wipe entire surface dry. Soft non-abrasive cleaners may be used when necessary. Strong abrasive cleaners will scratch and dull the surface.
- MICROGARD® is applied onto top and underside of sink deck, backsplash, and inside & outside of sink bowl (excludes faucets, drains, towel/soap dispensers, waste receptacle, skirt, pedal valves, and nail brush holder).

To order MICROGARD® on Hand Sinks:

Add suffix "-MG" to model number.

Example: HSA-10-F-MG

* MICROGARD® does not protect users or others against bacteria, viruses, germs or other disease organisms. Always clean this product thoroughly after each use.

Floor Troughs

A wide variety of uses: drain off at kettles, indirect waste drainage at walk-in boxes, or indirect waste drainage for sinks. 14 gauge type 304 stainless steel construction. Built-in pitch towards drain insures complete drainage. Floor troughs and floor drains come with subway-style stainless steel grating or fiberglass grating. Troughs and drains feature coved corners and removable perforated stainless steel basket, and accommodate up to a 4"-diameter waste pipe. Secured with anchor straps. Custom sizes available.

Anti-splash floor troughs available. "Anti-splash" design assures complete drainage while preventing splashing back onto the floor. Secured with anchor straps. Custom sizes available. To order, add suffix "AS" to model number.
